monitoring the progress of recommendations from the 2013 decadal survey Solar and Space Physics: A Science for a Technological Society. The committee held its first meeting as part of Space Science Week in Washington, D.C., on March 28-30, 2017. In advance of the meeting, and in response to discussions with the leadership of the Heliophysics Division of the National Aeronautics and Space Administration (NASA) and the Geospace Section of the National Science Foundation (NSF) Division of Atmospheric and Geospace Science, the committee identified the decadal survey's recommendation to create NASA-NSF heliophysics science centers (HSCs) as a timely topic for discussion. This report provides a set of options for NASA and NSF to consider for the creation of HSCs, including how to make the HSCs unique from other research elements and strategies for implementation.

Education is the most effective tool and a medium of human development. It changes the mindsets through a continuous process involving, research, experiment and innovation. Education is that source by which socially and economically marginalized children and adults can lift themselves out of poverty. Jawahar Navodaya Vidyalayas or JNVs are fully residential and co-educational schools affiliated to CBSE with classes from VI to XII standards. These JNVs are specifically tasked to find talented children in rural areas of India and provide them with an education equivalent to the best residential school system, without regard to their families' socio-economic condition. The present edition of 'Jawahar Navodaya Vidyalayas Entrance Exam 2021 for class 6' is the complete guide book that has been designed by to provide complete syllabus for the Jawahar Navodaya Vidyalaya Selection Test (JNVST) which is conducted by Navodaya Vidyalaya Samiti. Education and knowledge have never been more important to society, yet research is segmented by approach, methodology or topic. Legitimation Code Theory or 'LCT' extends and integrates insights from Pierre Bourdieu and Basil Bernstein to offer a framework for research and practice that overcomes segmentalism. This book shows how LCT can be used to build knowledge about education and society. Comprising original papers by an international and multidisciplinary group of scholars, Knowledge-building offers the first primer in this fast-growing approach. Through case studies of major research projects, Part I provides practical insights into how LCT can be used to build knowledge by: - enabling dialogue between theory and data in qualitative research - bringing together quantitative and qualitative methodologies in mixed-methods research - relating theory and practice in praxis - conducting interdisciplinary studies with systemic functional linguistics Part II offers a series of studies of pressing issues facing knowledge-building in education and beyond, encompassing: - diverse subject areas, including physics, English, cultural studies, music, and design - educational sites: schooling, vocational education, and higher education - practices of research, curriculum, pedagogy and assessment - both education and informal learning contexts, such as museums and masonic lodges Carefully sequenced and interrelated, these chapters form a coherent collection that gives a unique insight into one of the most thought-provoking and innovative ways of building knowledge about knowledge-building in education and society to have emerged this century. This book is essential reading for all serious students and scholars of education, sociology and linguistics.
